RE: REACH 209 SVHC's Compliance

The REACH Regulation, EC 1907/2006, of the European Parliament went into effect June 1, 2007. REACH (Registration, Evaluation, Authorization and Restriction of Chemicals) is a system for controlling chemicals in Europe. The regulation places the responsibility on industry to manage the risks from chemicals and to provide safety information on the substances.

An integral part of REACH is the Candidate List of "Substances of Very High Concern" (SVHC). The process is to target these SVHCs for replacement by less dangerous substances or technologies where feasible alternatives are available. The latest list was published on June 25th, 2020 and currently has 209 SVHC's. This list can be found on the ECHA website, <https://www.echa.europa.eu/candidate-list-table>

Advanced Laser has evaluated all of our raw materials, process materials and products. To the best of our knowledge, they do not contain any substances included on the REACH 209 SVHC list in a concentration in excess of the specified threshold limits. Advanced Laser will continue to work with our suppliers of raw materials, to ensure they have also evaluated and communicated information regarding changes and the presence of SVHC's in their products.

Advanced Laser monitors the ECHA website to obtain the latest information regarding any changes or additions to the REACH regulation, and/or SVHC list. If any relevant changes should occur that would require further action, Advanced Laser will provide the appropriate notification to our customer base.

If you have any questions regarding this information, please do not hesitate to contact us.

Sincerely,

Austin Miland
Quality Manager
Advanced Laser Machining Inc.
